

## ALL ROADS LEAD TOWARD EASTERN PART OF STATE

Country Around Clovis Being Filled Up With Settlers From All Parts of United States as Never Before.

(SPECIAL CORRESPONDENCE TO MORNING JOURNAL) Clovis, N. M., April 5.—Apparently all roads, both rail and wagon, lead to eastern New Mexico these days, as never before has such an influx of settlers into this country been witnessed as is taking place now, not even during the palmiest days of the rush for homesteads. Many are shipping their household goods, farming implements and stock to Farwell or Clovis, while others come overland the entire distance, generally to one of the other of these points, and from there they start out seeking locations. The wagon yards are full every night and it is not an infrequent occurrence to see as many as a dozen wagons in a string traversing the city streets and thence on out into the country, these wagons in many cases carrying the earthly possessions of the occupants, the general appearance of the latter indicating no evidences of race suicide.

Central Texas and western Oklahoma are furnishing the most of the newcomers to this section of the country, although Kansas, Missouri and Illinois, and even some of the states further east, are fairly well represented. But no matter where they come from, they are all of one mind, to find a home on the plains of eastern New Mexico, where, unlike the country from which they hail, land can be bought at prices that are not prohibitive to the man of small means, and where climatic conditions make it a pleasure to take up one's abode; also where, with a little hard work, diligently applied to the planting of and caring for crops and raising a few cattle and hogs, it will be only a few years until a man's independence from financial worries will be assured.

The crop outlook here has seldom been better at this season of the year. A recent rain and a snow put plenty of moisture in the ground for present needs. Wheat is looking fine, grass is getting green, the ground is in excellent condition for spring planting, and everybody is optimistic over the outlook for a successful and prosperous season.

## ADOLFO MUNOZ IS INDICTED FOR MURDER

(SPECIAL CORRESPONDENCE TO MORNING JOURNAL) East Las Vegas, N. M., April 5.—The first indictment returned by the grand jury now sitting in Santa Rosa was that of Adolfo Munoz, charging him with the murder of Juan Sandoval. The killing occurred in Vaughn on December 22, last, and is said to have been the result of a saloon quarrel. Munoz, when arraigned, said he was not guilty, but could not employ counsel. Judge David J. Leahy appointed Frank Faircloth and O. A. Larrazolo to defend Munoz.

It was said that Munoz might be willing to plead guilty to a charge of manslaughter if the court were willing to receive the plea. Felipe Sanchez is foreman and Manuel Alvarado secretary of the grand jury. It is believed that the spring term of court for Guadalupe county will end Thursday. No petit jury was called, and all persons indicted this spring will be obliged to await until September for trial.

Grocery Company Incorporates. Santa Fe, April 5.—Incorporation papers were filed today by the J. M. Bradford Grocery company, of Albino, Texas, with New Mexico headquarters at Clovis. The capitalization is \$400,000. H. R. Pike is named statutory agent.

Martinez Made a Notary. Santa Fe, April 5.—Governor McDonald today appointed Vicente Martinez, of La Llerena, San Miguel county, a notary public.

## For Piles

Pyramid Pile Treatment Is Used At Home and Has Saved a Vast Number from the Horror of Operation.

Don't permit a dangerous operation for piles until you have seen what Pyramid Pile Treatment can do for you in the privacy of your own home.

Remember Pyramid—Forget Piles.

No case can be called hopeless unless Pyramid Pile Treatment has been tried and has failed. Letters by the score from people who believed their cases hopeless are in our files. They fairly breathe the joy of the writers. Test Pyramid Pile Treatment yourself. Either get a box—price 50c—from your druggist or mail the coupon below right away for a perfectly free trial.

**FREE SAMPLE COUPON**  
PYRAMID DRUG COMPANY,  
222 Pyramid Bldg., Marshall, Mich.  
I desire to receive a free sample of Pyramid Pile Treatment, in plain wrapper.

## Antoinette Donnelly's Talks to Women on Beauty Topics

**Superfluous Hair.**  
SUPERFLUOUS hair on the face causes women who are troubled with it much unhappiness and worry. An excessive growth on the upper lip or on other parts of the face is usually a peculiarity of the structure of the skin. Some people have as a congenital characteristic an unusually abundant or coarse development of hair follicles. Sometimes this characteristic is individual, but in most cases it is hereditary and shows as a family tendency.

The trouble usually increases as a woman gets older and it often appears about middle life. Often you hear the cause of the trouble being attributed to the continued use of some application such as vaseline or cold cream containing lanolin or other oils, but it is rarely that the blame may be placed in this way. There is slight basis for the belief that vaseline, unless used continually and in quantity, would cause the growth of the hairs.

The only means of permanently removing superfluous hairs is electrolysis. If there is a growth of dark hairs it can be made much less conspicuous by frequent bleaching with hydrogen peroxide solution. This keeps the hairs light and at the same time dry. It certainly does not stimulate their growth, but tends to diminish it.

For milder cases peroxide of hydrogen diluted with equal parts of water may be applied by wetting a piece of cotton with the solution. This procedure must be repeated daily for a while before the desired result is obtained. An application of equal parts of peroxide and ammonia will bleach the hair first and after many applications tends to rot it.

A good depilatory may be applied to remove the hair under the arms. The following formula is one of the best that can be recommended: Sublimate of barium, two drams, oxide of zinc and starch, each three drams. Mix these well and keep tightly corked. When you apply this depilatory you add sufficient water to make a paste. The paste is then spread over the part and allowed to remain on for a couple of minutes. You then wash it off and apply a cold cream or soothing ointment to avoid irritation. Generally you can tell when the paste has been on long enough by a slight burning sensation.

## SILVER CITY MAN SHOT AND KILLED IN ALTERCATION

George B. Spangler, Prominent Automobile Dealer, Dead as Result of Quarrel With Constable in Duncan, Arizona.

(SPECIAL DISPATCH TO MORNING JOURNAL) Silver City, N. M., April 5.—George B. Spangler, member of the firm of Rowley and Spangler, auto dealers here, was shot and killed at Duncan, Ariz., today.

Spangler, who had gone to Duncan to deliver a motor car to a purchaser, got into an altercation with a man named Jesse Hill, who accused him of taking a gold nugget, which Charles Spangler denied. He is alleged to have drawn a gun and threatened to shoot Hill. Constable William Brooks was called and when he demanded that Spangler hand over his gun the latter began shooting, two bullets hitting the officer. Constable Brooks then shot Spangler three times, the latter dying within a few minutes. Brooks' wounds are not serious.

Spangler is survived by a widow and a daughter nine years old. He was a member of the Elks lodge here and held several medals as a crack pistol and rifle shot, and also a world's record as a long distance bicycle rider. He was 40 years old.

## ASPLUND TELLS ABOUT OFFICE THAT HE WANTS

(SPECIAL CORRESPONDENCE TO MORNING JOURNAL) Santa Fe, April 5.—Rupert P. Asplund, in his New Mexico Journal of Education sets forth the following facts about the state superintendent of public instruction, for which he is seeking the republican nomination: "It is gratifying to note that the teachers of the state are beginning already to urge the nomination of schoolmen for the office of state superintendent of public instruction. The constitutional requirements are that this officer must be a citizen of the United States, at least thirty years of age, a resident of the state for at least five years continuously next preceding his election, and a trained and experienced educator. The sentiment of the people of the state is, we believe, in line with these requirements. Furthermore, so far as the editor of this paper has been able to learn, party leaders are quite willing to reserve the state superintendent for a man who commands the respect and confidence of teachers, principals, superintendents and other educators of the state. It is impressed upon us, however, that there must be agreement among the educators of each party as to the strongest available candidate. If there is such agreement, the usual political considerations will be waived so as to permit the nomination by each party of a man who, on account of training, experience, acquaintance with conditions and administrative ability, can be depended upon to fairly represent all school interests of the state, and to keep New Mexico in the van of educational progress."

Since Asplund announced his candidacy letters have been pouring in from educators and others from every part of the state, pledging their support to him.

**Antoinette Donnelly's Answers.**  
IRVIN: Indigestion is simply the result of errors in diet. You will have to be careful of your diet and eliminate the foods which cause you the most distress, and get plenty of exercise in the open air. Avoid fried foods of any sort. Keep your bowels in a healthy condition by guarding against constipation. Avoid drinking coffee, if possible, as it acts most powerfully to retard the digestion. The juice of a pineapple is especially recommended for indigestion.

GRACE: The best time for exercising is in the morning, before breakfast. Then is when the vitality is at its highest, and the movements can be done with greater regularity. Have the room well ventilated but free from drafts. Wear loose fitting clothing, such as a night dress or union suit. Have your feet bare or wear stockings. If the exercises are strenuous only practice them for twenty minutes at first, gradually increasing to thirty or forty minutes.

KATHLYN: The only way to reduce flesh is to diet and exercise. I do not advocate eating lemons to reduce flesh. Eliminate all fat producing foods from your diet. Sleep only seven hours and take no naps during the day. Walk at least three miles a day. It may take several months to close enlarged pores. Yes, I have a formula I shall be glad to send to you, in addition to the reducing dietary, if you will send me a stamped, addressed envelope.

BABE: Exercising daily with the punching bag improves the form by developing lightness of foot, a springy step, and a graceful pose, even to a greater degree than by means of dancing lessons. I should not give up my dancing lessons, however, if I were you. Yes, I have a formula for freckles. I shall be glad to send it to you if you will send me a stamped, addressed envelope.

MAZIE: After the hair is dry and difficult to control for a day or two after washing. This can usually be remedied by one or two persistent brushings. If the hair is actually deficient in oil, it is best remedied by rubbing into the scalp and hair a little vaseline, olive oil, or sweet almond oil, not enough to give the hair a natural softness. I shall be glad to send you my instructions for scalp massage if you will send me a stamped, addressed envelope.

## POWER COMPANY FILES ESTIMATE ON BIG SCHEME

Development of White Rock Canyon Planned by Promoters; Enormous Benefits to State Promised.

(SPECIAL CORRESPONDENCE TO MORNING JOURNAL) Santa Fe, April 5.—The Rio Grande Light, Heat and Power company today filed with State Engineer James A. French the estimated cost of the proposed hydroelectric development at the mouth of the White Rock canyon of the Rio Grande and the estimated income of the plant. Charles G. Wilfong, president of the company, advises "that there is now no question as to the success of the White Rock canyon matter, as we have our financial plans practically completed, and on our return from our trip to the Gila we will immediately start in."

The territory to be served by the completed plant includes Albuquerque, Las Vegas, Santa Fe, Belen, Algodones, Bland, Cerrillos, Madrid, Willard, San Pedro, Estancia, and country in between. A population of more than 50,000 is to be served. At first, however, only Albuquerque, Santa Fe, Las Vegas and surrounding farming districts are to be served. The report says that it will not be practical at present to electrify the Santa Fe and other railroad systems traversing the territory to be served, but that it is likely that the proposed Durango, Farmington, Albuquerque & Roswell road will use electricity for motive power. Albuquerque. It is figured, will use over 7,000,000 kilowatt hours annually, yielding something like \$80,000 annually. Santa Fe, the report says, will consume 500,000 kilowatt hours annually. The present cost of production is 2.5 cents per kilowatt hour at the steam power plant and less than a cent a kilowatt hour at the hydroelectric plant in the Santa Fe canyon. It is proposed to sell the power to the Santa Fe Water and Light company for 1.5 cents per kilowatt hour. The present selling price in San Fe ranges from 4 to 7 cents per kilowatt for power and 15 cents for lighting. Las Vegas, it is figured, consumes 825,000 kilowatt hours, the Cochiti mining district 3,000,000 and the San Pedro mining district 3,000,000. Belen 320,000, farms 1,500,000 and a total consumption of 20,000,000 kilowatt hours, requiring 6,250 horse power on the low tension side or an output of 9,000 horse power on the wheel shafts. The immediate revenue is figured at \$178,257 a year with \$181,499 added within a few years. The report reviews in detail the industries, shops, mill and plants in the district to be served.

**Figures on Scheme.**  
The ultimate installation is to be 25,000 horse power, but the immediate installation is to be only 19,500 horse power, necessitating a dam sixty feet lower than at first figured. The Rio Grande is to be diverted by a flume to cost \$125,000, while the dam is being built, and coffer dams to cost \$14,000. There will be 53,000 cubic yards of earth excavated and 40,000 cubic yards of rock excavation, 12,440 cubic yards of masonry of concrete and puddling stone. The spillway gates are to be of steel. The cost of the dam is figured at \$772,650. The intake and penstocks are to cost \$137,310, the power house \$66,000, the machinery \$222,800, the transmission lines \$271,500, the sub-

stations \$180,000, together with incidentals, interest, etc., requiring an ultimate outlay of \$2,231,357.32, but the initial expenditure is to be \$1,629,614.97. The annual operating charges are figured at \$449,976. The interest on bonds \$121,000, sinking fund \$65,390, making a total annual outlay of \$245,576. The gross revenue from the sale of 34,500,000 kilowatt hours at 1.41 cents per kilowatt hour is figured at \$486,450, leaving a net profit per year of \$240,874. However, the initial gross income is to be only \$279,637, the initial annual charges \$35,946, interest \$96,569, sinking fund \$48,250, a total of \$180,765. The net income is therefore figured at \$89,961 at first, until the full development is reached.

Interesting is the information given about the Santa Fe shops at Albuquerque, and what are said to be assurances from Santa Fe officials. Says the report: "W. B. Storey, vice president of the Santa Fe railway system, has assured the writer that within one year the consumption of

the shops will be 237,000 kilowatt hours per month as against 100,000 kilowatt hours the present consumption. The Federal Light and Traction company, says the report, at present sells 3,000,000 kilowatt hours per year, generating it at a cost of about 1.40 cents per kilowatt hour, charging the consumers from 8 to 12.5 cents for lighting private residences and shops. The Albuquerque Traction company uses about 30,000 kilowatt hours per month. The Albuquerque Water Supply company is figured upon to take 600,000 kilowatt hours at 2 cents per kilowatt hour.

Spring. Spring is looked upon by many as the most delightful season of the year, but this cannot be said of the rheumatism. The cold and damp weather brings on rheumatic pains which are anything but pleasant. They can be relieved, however, by applying Chamberlain's Liniment. Obtainable everywhere.

## WILLIAM BRUBAKER IS HERE FOR WETS' STATE CONVENTION

William Brubaker, of Chicago, has been in Albuquerque for several days arranging the details for the state convention of the prohibition party, which has been called to meet in this city Friday afternoon. Mr. Brubaker is one of the field organizers for the national committee, and stands high in the councils of the party. He is a speaker of national reputation. His presence in the city has been taken advantage of by temperance workers and a mass meeting has been called for Friday evening in the Presbyterian church, to hear Mr. Brubaker on the liquor problem.

Phillies Trim Richmond. Richmond, Va., April 5.—The Philadelphia Nationals defeated the Richmond Internationals here today, 3 to 6.

**Hedding for Publicity.**  
Santa Fe, April 5.—Publicity, publicity, publicity was the extraordinary remedy that Dr. E. B. Hedding recommended to the Santa Fe Women's club yesterday afternoon to bring about better health conditions. He discussed the enforcement of quarantine and better living conditions and was loudly applauded.

## Beware of Ointments for Catarrh That Contain Mercury

as mercury will surely destroy the sense of smell and completely derange the whole system, when entering it through the mucous surface. Such articles should never be used except on prescription from reputable physicians, as the damage they will do is too told to the good they can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure to see you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by Druggists. Price, 75c. per bottle. Take Hall's Family Pills for constipation.
